SUMMARY

Electronics and Computer Engineering student with a strong foundation in Python programming, backend development, and Data Structures & Algorithms. Proficient in Python, Django, Flask, REST APIs, SQL, HTML, CSS, and JavaScript, with strong problem-solving skills demonstrated through a 50-day LeetCode coding streak. Passionate about building scalable backend applications, writing clean and maintainable code, and continuously learning modern technologies to contribute effectively in a collaborative software development environment.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Computer Engineering

08/2023 – 08/2027

College-Progressive Education Society's Modern College of Engineering

Pune/India

University - Savitribai Phule Pune University

Pursuing a Bachelor of Engineering in Electronics and Computer Engineering with a strong academic record (CGPA: 8.21/10). Developed a solid foundation in programming, data structures and algorithms, database management systems, operating systems, and computer networks.

SKILLS

- **Languages:** Python, Java, C++, SQL
- **Frameworks:** Django, Django REST Framework (DRF)
- **Databases:** PostgreSQL, Database Schema Design
- **Backend:** REST API Development, API Integration
- **Workflow:** Workflow Engine Development, Business Process Automation
- **Security:** Authentication & Authorization, Role-Based Access Control (RBAC)
- **Tools:** Git, GitHub

AI Tools:

Claude AI, OpenCode, Antigravity (AI-assisted development)

CERTIFICATES

- GeeksforGeeks Data Structure and Algorithms Bootcamp [🔗](#)
- CodeWithHarry The Ultimate Job Ready Data Science Course [🔗](#)

PROJECTS

CV Generator [🔗](#)

Developed a web application to generate professional resumes from user input. Built REST APIs using Django REST Framework and integrated PostgreSQL. Implemented user authentication and CRUD operations for resume management. Generated downloadable PDF resumes.

Django Web Scraper [🔗](#)

Developed a Django web scraping application using BeautifulSoup to automate data extraction, process HTML content, store scraped information in a database, and provide a user-friendly interface for viewing and managing results.

AI-Powered E-Commerce Platform [🔗](#)

Developed an AI-enabled e-commerce platform using Django with product management, user authentication, and CRUD functionality. Integrated AI-based product recommendations and smart search features to improve user shopping experience. Built a responsive interface using Tailwind CSS with efficient database management using Django ORM.

AI-Powered Expense Tracker | Django, HTML, Tailwind CSS, SQLite, AI API [🔗](#)

Developed an AI-enabled Expense Tracker using Django to manage income, expenses, and financial records with CRUD functionality. Integrated AI-based insights to analyze spending patterns and provide personalized expense recommendations. Built a responsive dashboard with Tailwind CSS for tracking and visualizing financial activities.
